

Ear (+3B)

A. EXTERNAL EAR

- 1 pinna (auricle)
- 2 external auditory meatus (canal)
- 3 tympanic membrane (eardrum)
- 4 fibrocartilage annulus

B. MIDDLE EAR

- 5 tympanic cavity
- 6 tensor tympani muscles
- 7 Eustachian (auditory) tube
- 8 malleus (hammer)
- 8a head of malleus
- 8b manubrium of malleus
- 8c anterior process of malleus
- 9 incus (anvil)
- 9a short crus of incus
- 9b long crus of incus
- 10 lentiform nodule
- 11 stapes (stirrup)
- 11a head of stapes
- 11b crus of stapes
- 11c base of stapes

C. INNER EAR (labyrinth)

- 12 vestibule
- 13 oval window (vestibular)
- 14 round window (cochlear)
- 15 lateral semicircular canal
- 15a ampulla ossea lateralis
- 16 anterior semicircular canal
- 16b ampulla ossea anterior
- 17 posterior semicircular canal
- 17c ampulla ossea posterior
- 18 cochlea
- 19 vestibulocochlear nerve
[auditory nerve, Nerve VIII]
- 20 internal carotid artery
- 21 tensor veli palatini muscle
